

# C11 - Highest-contributing focal cluster

Shared Stage 1 and Stage 3 profile

118 classes in 10 packages     $q_c = 0.146442$      $W_{in} = 6698$      $W_{boundary} = 1548$

Stage 1 and Stage 3 select the same highest- and lowest-contributing clusters.

## Composition of C11 Packages are internal subdivisions of the focal cluster.

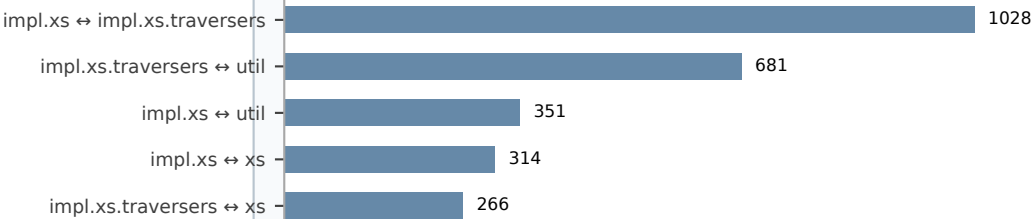

## Structural summary

Local modularity contribution  
**0.146442**

Internal structural weight  
**6698**

Boundary structural weight  
**1548**

### Five strongest between-package relations

Complete package-interaction data are available in the companion CSV.

## Strongest external destinations Top five plus deterministic remainder

## C07 - Lowest-contributing cluster

[DOMASException](#)

1 class     $q_c = 0.000000$   
 $W_{in} = 0$      $W_{boundary} = 0$

Isolated singleton  
No internal or boundary relations
